# Foreword

With the NL Pavilion, we showcase the Netherlands as a formidable, innovative, and sustainable industry partner.

The Netherlands stands as a prime example of a thriving innovation ecosystem—one where communication is clear and collaboration is seamless. We unite startups, scale-ups, SMEs, multinationals, knowledge institutions, and governments to spark international partnerships that drive progress. In partnership with three leading sectors—High Tech Systems and Materials, ICT, and Chemistry—we present at Hannover Messe the groundbreaking innovations and essential technologies that underpin both industry and society.

From artificial intelligence and advanced integrated chips (and the sophisticated machinery that produces them) to electrolyzers powering industrial hydrogen production, sustainable mobility solutions, robust digital systems, and quantum technologies that enhance security, our offerings are truly pioneering. In the realm of sustainable chemistry, we highlight innovations like energy-efficient catalytic processes that convert renewable feedstocks into high-value, eco-friendly products—revolutionizing chemical production and reducing environmental impact. These advancements not only boost efficiency but also accelerate sustainability, redefining the future of manufacturing and energy.

Top sectors HTSM, ICT and Chemistry,  
On behalf of all NL Pavilion participants

Netherlands

## AI / Big Data / Data Security

### Centre of Excellence for Data Sharing & Cloud

The Centre of Excellence for Data Sharing & Cloud (CoE-DSC) is the central hub in the Netherlands supporting development, growth and adoption of data sharing initiatives and solutions. One of the focus topics is Digital Product Passports (DPP). See [www.CoE-DSC.nl](http://www.CoE-DSC.nl) for more information.

[www.CoE-DSC.nl](http://www.CoE-DSC.nl)

[info@coe-dsc.nl](mailto:info@coe-dsc.nl)

### GetFocus

GetFocus enables R&D leaders to validate hypotheses and reduce investment risk with AI-driven technology scouting, evaluation, and forecasting. We reveal which innovations will take off—eliminating guesswork, ensuring smart, timely decisions, and giving experts data to support strategic R&D bets.

[www.getfocus.eu](http://www.getfocus.eu)

[adriaanandringa@getfocus.eu](mailto:adriaanandringa@getfocus.eu)

### Sorama

Based in Eindhoven, Netherlands, we drive innovation for a better-sounding world. Our technology visualizes gas leaks, mechanical anomalies, and partial discharge, helping industries reduce noise and emissions.

[www.website.com](http://www.website.com)

[name@domain.nl](mailto:name@domain.nl)

## Digital Ecosystems / Embedded Technologies / Digital Content

### 270 Degrees

World's most flexible 3D solution starts with just one line of code.  
`<div class="js-270viewer"></div>`

Our web based technology empowers you to easily create custom 3D experiences, seamlessly across any platform.

 [yourstoryz.com/  
hannovermesse/](http://yourstoryz.com/hannovermesse/)

 [info@yourstoryz.com](mailto:info@yourstoryz.com)

## EVAjig

EVAjig provides turn-key solutions for production-testing and provisioning of electronics. EVAjig combines a generic platform that provides many commonly-used functionalities with easily exchangeable cassettes. All tests and results are available in an online portal, for full traceability.

## Holoconnects

Holoconnects transforms communication with holographic technology, enabling lifelike remote interactions. Our solutions enhance engagement in healthcare, retail, and education. We provide innovative, sustainable, and immersive experiences, bridging digital and real-world connections.

## TokenMe

TokenMe is transforming the construction industry through advanced AI-powered, easy-to-install, IoT solutions uniquely adapted to the realities of large construction sites. Our smart anchors and tokens (battery powered) automatically shows real time information that is currently captured by hand.

## YourStoryz.com

YourStoryz revolutionizes storytelling with AI-powered content creation. Effortlessly craft video storyz, blogs, and social posts. Elevate your brand, streamline content, and boost engagement. Ideal for entrepreneurs, creators, and brands. Start telling your story.

## Energy Transition

### Ecoplant Sun Tracing Solar Systems

Efficient and economical award-winning solar technology! All in one: energy charger, battery backup and safety device. The Ecoplant energy system is based on patented technology including Nano and Albedo. Ecoplant exclusive sustainable innovations made in the Netherlands.

- [www.ecoplant.solar](http://www.ecoplant.solar)
- [hans@ecoplant.solar](mailto:hans@ecoplant.solar)

### Entropic

Do you develop amazing heat decarbonization technologies, but waste too much time and money on pre-engineering for potential clients? The Entropic platform turns months of pre-engineering into a few hours helping OEMs and engineering firms accelerate project development.

- [www.entropic-energy.com](http://www.entropic-energy.com)
- [melchiorkrijgsman@entropic-energy.com](mailto:melchiorkrijgsman@entropic-energy.com)

### LeydenJar

Revolutionizing electrification with 100% silicon anodes for lithium-ion batteries. Next-generation tech achieving ultra-high energy density, cycling without pressure and fast charging for smart devices. Currently scaling to mass production with patented and sustainable PECVD production modules.

- [www.leyden-jar.com](http://www.leyden-jar.com)
- [tim.aanhane@leyden-jar.com](mailto:tim.aanhane@leyden-jar.com)

### NoaTEQ Netherlands

NoaTEQ is specialised in the development and realisation of industrial equipment and apparatus for +30 years. To mitigate restricted grid connections and electricity fluctuation, we implement Energy Storage Systems for load balancing and peak shaving to secure and increase your production capacity.

- [www.noateq.com](http://www.noateq.com)

[info@ibspe.com](mailto:info@ibspe.com)

[www.dialoguetrainer.com](http://www.dialoguetrainer.com)

[info@dialoguetrainer.com](mailto:info@dialoguetrainer.com)

[www.l2l.com](http://www.l2l.com)

[ianni.le@leading2lean.com](mailto:ianni.le@leading2lean.com)

## Engineered Parts & Solutions

### HQ Pack

We create to protect! We are a global full-service provider of high-tech packaging, specializing in design, production, cleaning, and reuse. Our high-end solutions ensure safe transportation of valuable and fragile products, modules and parts, across the globe.

empowered by

### IBS Precision Engineering

Your partner for ultra-precision measurement, positioning & sensor solutions.

- Metrology expertise
- World class engineering
- Unique solutions for every environment

## Future of Work

### DialogueTrainer

Experience the future of workforce training! Using a unique combination of psychology, science and responsible AI, our conversation simulations boost productivity and drive performance. Our scalable and data-driven platform reduces costs while aligning employee growth with business strategy.

### L2L

The connected workforce platform for those who drive action. We help manufacturing teams solve for downtime, production performance, and team collaboration. Identify root causes and connect the right people to the right actions. Bye-bye disruptions.

## Research and Technology Transfer

### TechForFuture

High-tech firms in East Netherlands need skilled HBO tech graduates. TechForFuture unites Saxion & Windesheim's expertise in HTSM & key technologies. Through public-private projects, businesses, researchers & students co-develop solutions, boosting innovation & education.

 [www.techforfuture.nl](http://www.techforfuture.nl)

 [info@techforfuture.nl](mailto:info@techforfuture.nl)

## Semiconductors / Sensors / Lasers

### Magnetic Innovations

Magnetic innovations bv. is a global supplier for the Semiconductor, Aerospace, Industrial, automotive and Consumer markets. We guarantee High Quality Standards, reliability and advanced technological know-how.

empowered by

## MAGNETIC INNOVATIONS

the direct drive motor company

 [www.magneticinnovations.com](http://www.magneticinnovations.com)

 [info@magneticinnovations.com](mailto:info@magneticinnovations.com)

empowered by

### PhotonFirst

Innovations in fiber optic sensing integrated with photonic chips – multi-point strain, temperature, vibration and multi-parameter sensing technology for industrial monitoring and process control.

 [www.photonfirst.com](http://www.photonfirst.com)

 [tarun.tampi@photonfirst.com](mailto:tarun.tampi@photonfirst.com)

### Qualinx

Qualinx develops the world's smallest & lowest power consumption GPS/GNSS & IoT chips with a multipurpose radio, ideal for space constrained embedded battery operated devices. Our technology delivers up to 10x improvement of battery life for electronics, therefore helping lower the global energy footprint.

 [www.qualinx.io](http://www.qualinx.io)

 [info@qualinx.io](mailto:info@qualinx.io)

- [www.toperform.nl](http://www.toperform.nl)
- [stefan.buikema@toperform.nl](mailto:stefan.buikema@toperform.nl)

### ToPerform - Optimizing your flow

Detect fouling in pipelines externally—no shutdowns, no inspections. In the process of working with a leading international chemical manufacturer as our launching customer we are looking to expand with more factory trials. Meet us at Hannover Messe 2025 to explore early partnerships & market expansion within industries.

Brainport Industries

- [www.brainportindustries.com/en](http://www.brainportindustries.com/en)
- [info@brainportindustries.nl](mailto:info@brainportindustries.nl)

## Smart Manufacturing & Circularity

### Brainport Industries

Brainport Industries is the leading network of high-tech suppliers in the Netherlands. Based in the Brainport Eindhoven region, one of Europe's most innovative high-tech hubs, this network focuses on cooperation, knowledge sharing and innovation within the manufacturing supply chain.

- [www.douna.nl](http://www.douna.nl)
- [h.wijnja@douna.nl](mailto:h.wijnja@douna.nl)

### Douna Machinery

Precision. Innovation. Seamless integration. From engineering to welding and machining; we create system solutions that bring your ideas to life.

empowered by

- [www.nobleo.nl](http://www.nobleo.nl)
- [info@nobleo.nl](mailto:info@nobleo.nl)

### Nobleo Embedded Systems

Battery Management System, scalable and customizable for domain specific purposes.

empowered by

## Quick Change Mould

Experience unmatched speed and flexibility with the Quick Change Mould. Swap inserts in seconds, accelerate R&D, and shorten your development cycle. Compliant with ISO and ASTM standards, backed by 100 years of expertise. Redefine what's possible in plastic technology!

- [www.quickchangemould.com](http://www.quickchangemould.com)
- [info@quickchangemould.com](mailto:info@quickchangemould.com)

## Settels Savenije Group of Companies

At Settels Savenije, we design, manufacture, assemble, and test high-tech modules, parts, and tools, providing complete solutions from concept to finished product. With an integrated approach ensuring collaboration and quality, we serve global customers in Semicon, Analytics, Industry, and Research.

- [www.sttts.nl](http://www.sttts.nl)
- [martijn.van.duijn@sttts.nl](mailto:martijn.van.duijn@sttts.nl)

## SMITHBIO

ASME-BPE Fabrication of Components & Equipment and Design Engineering of Processing Solutions for Food, Pharma, Biotech, and Chemistry Industries. Seeking to connect with in European and Middle East distributors.

- [www.smithbio.eu](http://www.smithbio.eu)
- [rienk@smithbio.eu](mailto:rienk@smithbio.eu)

## Smart Mobility & Drones

### Tulip Tech

At Tulip Tech, we are revolutionizing UAV technology by enabling drones to fly 30% to 100% farther, using smart battery solutions with western-sourced components to ensure reliability and compliance.

- [www.tulip.tech](http://www.tulip.tech)
- [alexander@tulip.tech](mailto:alexander@tulip.tech)

 [www.ecube-equipment.com](http://www.ecube-equipment.com)

 [eu@ecube-international.com](mailto:eu@ecube-international.com)

### Ecube International

Ecube is a leading provider of innovative mobile power solutions, specializing in emission-free, high-capacity onboard power and air. Our lightweight, modular equipment optimizes sustainability, efficiency, and flexibility. Our solutions withstand extreme weather, resist damage, and ensure safety.
